

GAS TURBINE

SGT-A20 (Industrial Avon)

Whatever model of industrial Avon you operate, we can support it.

Our capability and experience extends across the full range of industrial Avon gas generators, from the earliest Mk 1533 and 1534, right through to the current Mk 1535, as well as the latest generation Avon 200 engines.

For more than 26 years, the global power generation and oil & gas industries have benefitted from our expertise. We have serviced more than 2200 industrial Avon gas generators within our approved maintenance facility in the UK where we have delivered 110 Avon 200 upgrades for 24 operators in 16 countries.

We are proud to be the service provider of choice for more than 60% of industrial Avon gas generators in service around the world. We help operators keep their equipment running reliably and cost-effectively.

Our services for the industrial Avon include:

- Repair and overhaul services
- Field service
- Refurbishment and supply of spare parts
- Service agreements
- Component repair
- Testing
- Upgrades and modifications

RWG
REPAIR & OVERHAUL EXPERTISE

Our experience is unrivalled

With a dedicated industrial Avon team of more than 50 highly experienced people, you know your equipment is in safe hands at RWG. Our product knowledge and technical expertise is unrivalled in the industry. We have the capacity to support up to 60 engines each year. Our services are OEM approved. And our workshops are equipped with specialist tooling and the latest technologies.

Whatever your requirement, you can trust us to help lower the cost of ownership of your equipment.

Full scope of service for your industrial Avon

We are here to support you whenever and wherever you need us. We can meet all of your maintenance, repair, overhaul and performance testing requirements within our state of the art, dedicated industrial Avon gas generator facility in the UK. You'll benefit from our technologically innovative component repair solutions, designed to enhance the service life of your gas generator parts.

And when it comes to spare parts, inventory management, exchange engines and field service, we can deliver.

Gas generator advance exchange

We provide an advance exchange option for operators who don't have the luxury of time or rotatable assets within their fleet. Typically, this service requires assembly and configuration of an exchange gas generator in advance of a planned maintenance event.

We'll ship the replacement engine to you ready for immediate exchange and matched to your site specific configuration. Our service option can include installation and commissioning to minimise plant downtime and let you resume business operations with minimal disruption.

Get in touch with us to discuss your industrial Avon gas generator service requirements.
