GAS TURBINE

Marine gas turbines

We bring our outstanding product knowledge and depth of experience with industrial gas turbines, and apply them to the marine propulsion industry.

Our capability extends across the Rolls-Royce marine Spey SM1A, SM1C, Tyne and WR-21. We work in partnership with Rolls-Royce to deliver exceptional service, maximise engine uptime and reduce maintenance costs.

We are proud to be the exclusive provider of maintenance services for marine gas turbines used on Royal Navy warships. These engines power naval vessels during warfighting, peace keeping and maritime security operations around the world.

When it comes to marine gas turbines, we understand the needs of the naval defence sector. Optimising the performance and availability of critical marine propulsion equipment is our priority. We deliver the highest standards of service, quality and safety in everything we do.

Our services for marine gas turbines include:

- Repair and overhaul services
- Field service
- Refurbishment and supply of spare parts
- Service agreements
- Component repair
- Testing
- Upgrades and modifications

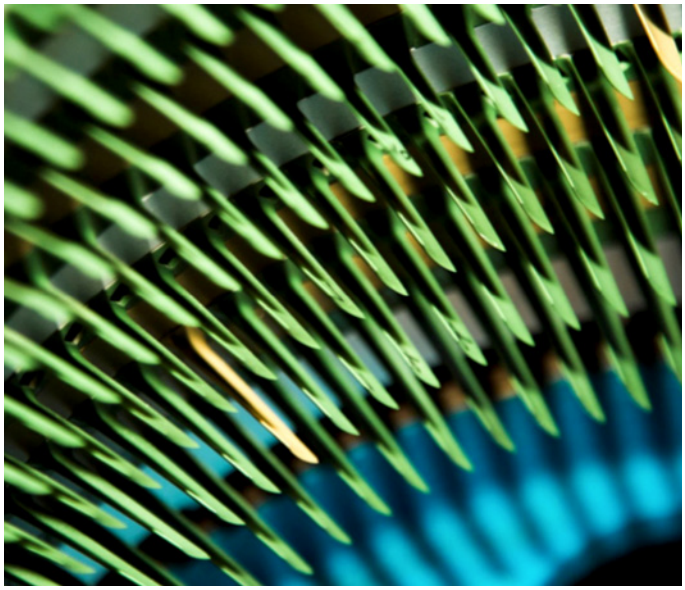
RWG
REPAIR & OVERHAUL EXPERTISE



Dependable experience

In 2013, we strengthened our capability and introduced marine gas turbines to our service portfolio. But the skills, experience and know-how we apply to this equipment dates back more than 29 years.

Marine gas turbines are in safe hands within our dedicated 7,500 sq ft facility in the UK. It is equipped with the full range of specialist tooling and state of the art technologies you would expect from a world-leading service provider.

We are the dependable partner of choice to help lower the cost of ownership of marine gas turbines.

Exceptional service for marine gas turbines

At RWG, we provide full maintenance, repair and overhaul support within our state of the art gas turbine facilities.

Component repair is our specialty and our in-house technology is second to none. We offer a comprehensive suite of repairs and processes that enhance the service life of marine gas turbine components.

And we'll demonstrate the integrity of marine equipment before it is returned to service within our in-house gas turbine test facility in the UK.

Get in touch with us to discuss your marine gas turbine service requirements.
