REPAIR & OVERHAUL EXPERTISE

Parts provision

We have an extensive stock of genuine OEM spare parts available at all of our global locations. So you can rely on us to meet market-leading turn times for your industrial and marine gas turbines. Our stockholding is ready for immediate distribution either to support our repair and overhaul business or independently to meet your operational needs.

In addition to our new part service, we have also invested in expired assets. This gives you the option of used serviceable, service run and overhauled components. All used parts are supplied with comprehensive history and will meet the OEM serviceability criteria, allowing you to benefit from this cost-reducing alternative.

Refurbishment

Do you have engine accessories or components that require bench test or refurbishment? Our industry-leading repair and overhaul service extends to the standalone refurbishment of parts, sub-assemblies and engine accessories. We are delighted to offer this 'minor-works' option to all operators.

From basic function testing of bleed valve and hydraulic ram assemblies, to full overhaul of fuel nozzles, gearboxes and starter motors, sensors and thermocouples, we'll work with you to ensure each component is returned to you promptly and ready for another service life.

Our refurbishment service is commonly applied to the following areas, however may extend to any gas turbine part:

- Fuel delivery – fuel nozzles, manifolds, fuel control units and pumps
- Air flow control – bleed valves, hydraulic rams and solenoids
- Oil system – pumps and sumps
- Starters – air/gas, hydraulic and electric and associated gearboxes
- Instrumentation – sensors, speed pick-ups, electrical harnesses and thermocouples

If you require on-site assistance with removing and fitting these parts, we can help you there too.

Get in touch with us to discuss your gas turbine spare parts requirements.
