GAS TURBINE

SGT-A05 (Industrial 501)

We are your ideal maintenance, repair and overhaul partner for industrial 501-K gas generators.

For more than 29 years, operators throughout the world have benefitted from our unrivalled product knowledge and depth of capability.

We have serviced over 1100 engines within our dedicated 501-K maintenance facilities. And we are authorised by the OEM, so you know our work is backed by robust technical and engineering expertise.

Operators both onshore and offshore depend on the industrial 501-K as a source of power. You can depend on us to help keep your equipment running safely, reliably and cost-effectively.

Our services for the industrial 501-K include:

- Repair and overhaul services
- Field service
- Refurbishment and supply of spare parts
- Service agreements
- Component repair
- Testing
- Upgrades and modifications

RWG
REPAIR & OVERHAUL EXPERTISE

Where experience matters

With a dedicated industrial Avon team of more than 50 highly experienced people, you know your equipment is in safe hands at RWG. Our product knowledge and technical expertise is unrivalled in the industry. We have the capacity to support up to 60 engines each year. Our services are OEM approved. And our workshops are equipped with specialist tooling and the latest technologies.

Whatever your requirement, you can trust us to help lower the cost of ownership of your equipment.

Full scope of service for your industrial 501-K

Our capability extends across the full range of industrial 501 KA, KB, KC, KH engines, as well as KF, K17, K34 and MT5 marine versions. No matter what model of industrial 501-K you operate, we can support it.

We have a 42,000 sq ft dedicated service centre in Houston, Texas for 501-K engine overhaul and component repair, as well as two sophisticated performance test facilities, in Texas and California.

And as an RWG customer, you'll benefit from our 24/7 global field service support. We are committed to ensuring the availability of your equipment. We bring our expertise to you, wherever and whenever you need us.

Combustion Liner Exchange Program (CLEP)

We are proud to be the OEM's worldwide distributor for industrial 501-K exchange combustion liners. This service is brought to you through our unique Combustion Liner Exchange Program (CLEP) from our Houston service centre.

All parts delivered through CLEP are fully overhauled by OEM approved vendors in accordance with OEM procedures.

Our exclusive CLEP program means you benefit from the just in time availability of high quality repaired parts. This minimises your equipment downtime and returns your 501-K gas generators to operational service safely and reliably.

Gas generator advance exchange

We provide an advance exchange option for operators who don't have the luxury of time or rotable assets within their fleet. Typically, this service requires assembly and configuration of an exchange gas generator in advance of a planned maintenance event.

We'll ship the replacement engine to you ready for immediate exchange and matched to your site specific configuration. Our service option can include installation and commissioning to minimise plant downtime and let you resume business operations with minimal disruption.

Get in touch with us to discuss your industrial 501-K gas generator service requirements.
